

Facet Joint Injections & Nerve Root Blocks

Injections into the sliding joints at the back of the spine (facet joints) or next to the nerves of the neck or lower back as they leave the spine (nerve root injection or blocks) are ways to treat neck, back and leg pain not helped by other treatments.

Preparation

Please inform us if you are on medication to thin your blood (e.g., Warfarin, Aspirin).

If you are on special drugs or have diabetes and are on insulin, take your usual medicines and diet.

Procedure

While you lie flat on your stomach on an x-ray table, the cleaned back area will be injected with local anaesthetic.

Guided by x-ray or CT scanning, a needle will be put into the facet joint or next to the nerve. Local anaesthetic and cortisone (steroid) solution will be injected. This may be uncomfortable for a very short time during the injection until the local anaesthetic takes effect.

This procedure takes approximately 30 minutes. Afterwards you may stay with us for a short time. You may then continue your usual activities or rest if you wish.

It is best if you do not drive yourself home, but if unavoidable, allow 2 hours for the effect of local anaesthetic to wear off.

How long will the treatment last?

The effect varies for different people. There may be relief for months to years, but this is a treatment, not a cure, for back problems. Some people get no benefit.

What are the side effects?

There may be slight soreness or bruising at the needle site. Any other problems are very rare.

You may temporarily experience some numbness in the injected area or down the affected leg. Rarely does headache occur as a side effect. You should minimise physical activity for 12 hours after the injection.

Very rarely serious side effects causing permanent neurological damage occur, which are independent of operator skill. The radiologist and your referring doctor will discuss this with you when obtaining your consent.

PLEASE BRING ANY PREVIOUS X-RAYS OR SCANS WITH YOU ON THE DAY OF YOUR EXAMINATION.

CONFIRM ANY PREPARATION REQUIRED WITH STAFF WHEN MAKING YOUR APPOINTMENT.

Your doctor may request to go filmless

With the growing use of digital imaging, Ultrascan Radiology is giving doctors the opportunity to not receive hard copy films and to replace them with electronic reports and images – in other words, go “filmless”.

If your referring doctor elects to go “filmless,” once you have completed your medical imaging examination, you will no longer have to wait for x-ray films. The images will be sent electronically to your doctor’s computer together with a report from our Radiologist.

If you require films in the future, all films are stored digitally and can be requested at anytime with 24 hour notice.

FACET JOINT INJECTIONS ARE PERFORMED AT OUR ERINA,
KANWAL, LONG JETTY & BRISBANE WATERS CLINICS

Central Coast Radiology & Nuclear Medicine clinics

Erina

194 The Entrance Road, Erina 2250
Ph: 4365 1866 | Fax: 4365 1814

Long Jetty

4/13-15 Thompson Street, Long Jetty 2261
Ph: 4332 5532 | Fax: 4332 6262

Brisbane Waters

21 Vidler Avenue, Woy Woy 2256
(in Brisbane Waters Private Hospital)
Radiology: Ph: 4343 1066 | Fax: 4344 2171
Nuclear Medicine: Ph: 4342 2061 | Fax: 4342 7681

Gosford (Nuclear Medicine)

99-101 Holden Street, Gosford 2250
Ph: 4323 1844 | Fax: 4323 1261

Kanwal

654 Pacific Highway, Kanwal 2259
(in the Medical Complex at Wyong Hospital)
Radiology: Ph: 4393 0200 | Fax: 4393 0201
Nuclear Medicine: Ph: 4393 1000 | Fax: 4393 2111
