

Image-Guided Biopsy

Biopsy is a procedure in which samples of tissue (core) or fluid (aspiration) are taken through a needle and sometimes under local anaesthetic. This may be performed using ultrasound guidance or CT (Computed Tomography) scan.

The radiologist will insert a needle to take a sample of cells, which are then sent to a pathology laboratory where a specialist pathology doctor will interpret the specimen. The pathology report will be sent to your referring doctor who will then convey these results to you.

Preparation

Fast for 2 hours prior.

→ ANTICOAGULANTS

If you take blood thinners such as Warfarin or Aspirin you may need to stop this medication prior to the procedure. Please discuss this with your doctor and inform us when you make your appointment.

→ HEART VALVE REPLACEMENT

If you have a heart valve replacement, it may be indicated to take an antibiotic cover. Please discuss this with your doctor and inform us when you make your appointment.

Procedure

The procedure may be undertaken using either ultrasound or CT to localise the biopsy site.

You will be asked to sign a consent form once the procedure and associated risks are discussed with you.

An area to be biopsied will be checked and an area of skin will be cleaned with an antiseptic.

The radiologist may inject a local anaesthetic to numb the skin, and insert a needle to obtain some tissue. Several samples of tissue may be required.

The sample(s) will be sent to Pathology for study and the Pathologist will send a report to your referring doctor. This usually takes 2 to 4 days.

Depending on the area biopsied you may be required to have an x-ray immediately after the biopsy. You may then be observed in our clinic for up to 4 hours.

How long will the procedure take?

The whole procedure will take between 30 and 60 minutes to complete.

After the procedure

Following the biopsy, you will be asked to press firmly on the area for 10 minutes to stop any bleeding.

There may be some bruising following the biopsy. This may be quite prominent, but will always disappear.

Rarely are there any significant complications such as infection or excess bleeding.

You may feel more comfortable having someone with you to drive you home, however this is not always necessary.

The biopsy site will be covered. This dressing is waterproof so you may shower normally and can remove it three to four days after the procedure.

Following the procedure there may be some discomfort. If required, a simple analgesic such as Panadol (not Aspirin) should be sufficient. You should avoid strenuous activity for 24 hours following the biopsy.

If you notice excessive bruising, swelling, bleeding, redness or heat at the biopsy site we urge you to contact the radiologist or your referring doctor.

Please contact your referring doctor to discuss the results.

PLEASE BRING ANY PREVIOUS X-RAYS OR SCANS WITH YOU ON THE DAY OF YOUR EXAMINATION.

CONFIRM ANY PREPARATION REQUIRED WITH STAFF WHEN MAKING YOUR APPOINTMENT.

Your doctor may request to go filmless

With the growing use of digital imaging, Ultrascan Radiology is giving doctors the opportunity to not receive hard copy films and to replace them with electronic reports and images – in other words, go “filmless”.

If your referring doctor elects to go “filmless,” once you have completed your medical imaging examination, you will no longer have to wait for x-ray films. The images will be sent electronically to your doctor’s computer together with a report from our Radiologist.

If you require films in the future, all films are stored digitally and can be requested at anytime with 24 hour notice.

IMAGE-GUIDED BIOPSY IS PERFORMED AT OUR
ERINA, KANWAL & BRISBANE WATERS CLINICS

Central Coast Radiology & Nuclear Medicine clinics

Erina

194 The Entrance Road, Erina 2250
Ph: 4365 1866 | Fax: 4365 1814

Long Jetty

4/13-15 Thompson Street, Long Jetty 2261
Ph: 4332 5532 | Fax: 4332 6262

Brisbane Waters

21 Vidler Avenue, Woy Woy 2256
(in Brisbane Waters Private Hospital)
Radiology: Ph: 4343 1066 | Fax: 4344 2171
Nuclear Medicine: Ph: 4342 2061 | Fax: 4342 7681

Gosford (Nuclear Medicine)

99-101 Holden Street, Gosford 2250
Ph: 4323 1844 | Fax: 4323 1261

Kanwal

654 Pacific Highway, Kanwal 2259
(in the Medical Complex at Wyong Hospital)
Radiology: Ph: 4393 0200 | Fax: 4393 0201
Nuclear Medicine: Ph: 4393 1000 | Fax: 4393 2111
